2-way valve

NEW

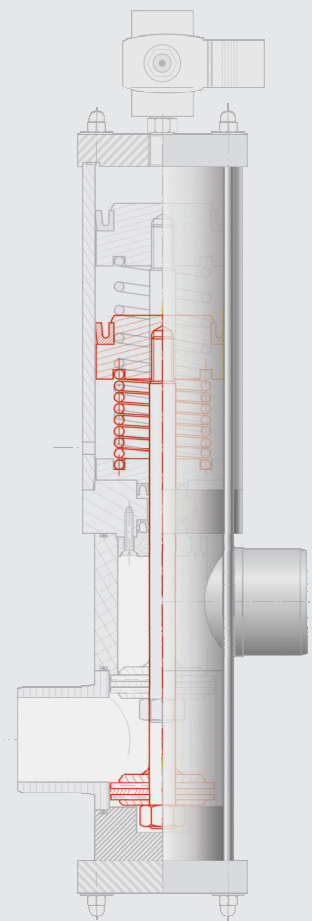

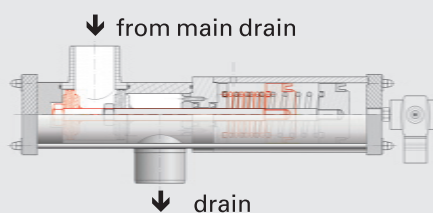

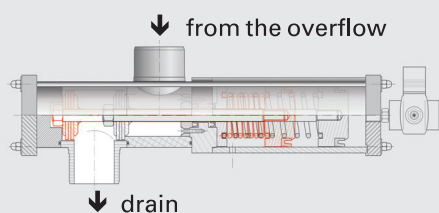

Automatic valve for:

- Cleaning overflow channel
- Emptying swimming pool

Installation A

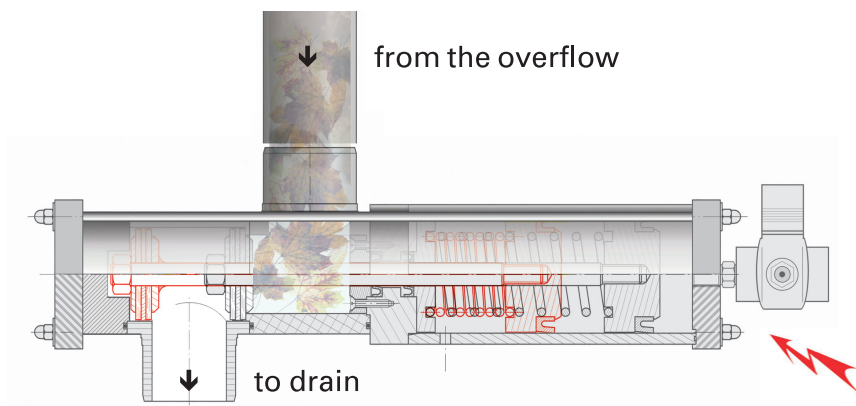

Installation B

Installation A

Connection to cleaning overflow channel

The water column is limited 3 m

Installation A

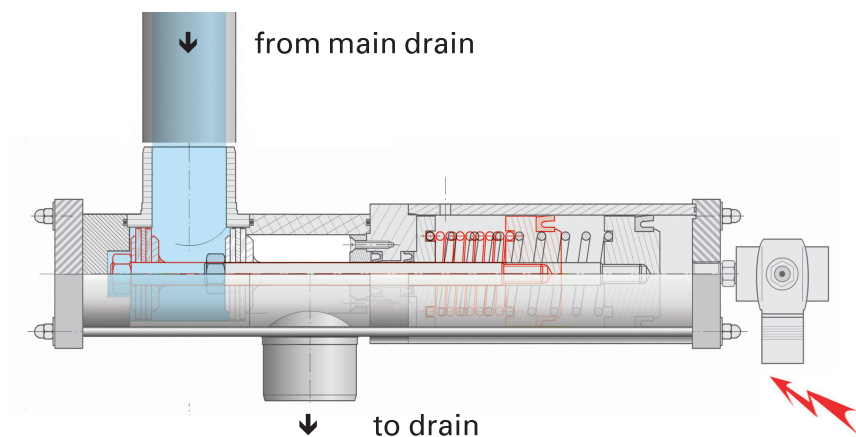

The water column is limited 3 m amount otherwise the leaking valve.

When opening the 2-way valve can leaves and dirt parts do not block the valve.

Without electricity - valve closed

Installation B

Connection to emptying swimming pool

Installation B

The water also helps to seal - the higher the pressure the better.

With electricity - the shut-off valve opens

Without electricity - valve closed
